

## BASIN ATTRACT CONCRETE 1000

Item number: 320214

Washbasin in cast concrete in a modern form and with an industrial look. Spacious sink and good storage space. Each copy is made by hand and is therefore unique. Concrete is rustic and to the surface lively with variations in color. The inside and top of the sink are sealed to close the pores of the concrete making it more stain resistant. Natural pores on the outside of the sink may occur. Available in sizes 600, 800, 900 and 1000mm and fits the furniture series City, Vogue and Studio. Does not have overflow protection. Add a bottom valve and water trap.

### Detailed information

#### Item number

NOBB	57887022
RSK	7781037
EAN	7340032433081

#### Standards and classifications

ETIM	EC011550
EN standard	EN14688
CE marked	Yes

#### Product dimensions and weight

Width	1010
Depth (mm)	465
Height (mm)	135
Net weight (kg)	18

#### Material and surface treatment

Color	Dapple-grey
Main material	Concrete

#### Packaging dimensions and weight

Package height(m)	0,210
Package width (m)	1,070
Package depth(m)	0,520
Package weight(kg)	20,000

### Care instructions

Concrete is a rustic material with natural variations in colour and surface, the material ages when used. Treat the surface of your concrete wash basin regularly, you will find a remedy for concrete at well-stocked specialist retailers. The inside of the washbasin is sealed to close pores and make the surface more resistant to stains. Wipe of water drops with a soft cloth after use to avoid lime coating. If water is left standing in the basin, dark areas may occur which disappear after a few hours. Do not expose the washbasin to water with a temperature higher than 60 ° C or rapid temperature changes. Clean the washbasin with a damp cloth and possibly a little diluted detergent. Always use a soft cloth, avoid steel wool and the like. Avoid cleaners and products containing abrasives, acids, ammonia, acetone or other chemicals (eg scrubbing powder, hair spray, hair colour, bleach, hair removal and nail polish remover etc.). Should you spill any of the above products on the wash basin it should be removed immediately to avoid damage.
