

BASIN ATTRACT 600 CONCRETE

Item number: 320212

Washbasin in cast concrete, with a modern industrial look. Spacious sink bowl with large flat surfaces on top of the sink. Each washbasin is handmade and therefore unique. The concrete surface is rustic and vibrant with several variations in colors. The sinks inside and top is sealed to close the pores of the concrete making it more stain resistant. Natural pores on the outside of the sink may occur. Available in sizes 600 and 900mm and suitable for City, Vogue and Studio furniture series. Does not have overflow protection. Add bottom valve and water trap.

Care instructions

Concrete is a rustic material with natural variations in colour and surface, the material ages when used. Treat the surface of your concrete wash basin regularly, you will find a remedy for concrete at well-stocked specialist retailers. The inside of the washbasin is sealed to close pores and make the surface more resistant to stains. Wipe of water drops with a soft cloth after use to avoid lime coating. If water is left standing in the basin, dark areas may occur which disappear after a few hours. Do not expose the washbasin to water with a temperature higher than 60 ° C or rapid temperature changes. Clean the washbasin with a damp cloth and possibly a little diluted detergent. Always use a soft cloth, avoid steel wool and the like. Avoid cleaners and products containing abrasives, acids, ammonia, acetone or other chemicals (eg scrubbing powder, hair spray, hair colour, bleach, hair removal and nail polish remover etc.). Should you spill any of the above products on the wash basin it should be removed immediately to avoid damage.
